WHAT IS A MINERAL ESTABLISHMENT?

A mineral establishment is a single physical location where mineral operations are performed. It represents a working or group of workings at a given locality in which operations are conducted as a unit or are unified by common management or joint handling of some part of the mining or processing process.

- Individual shafts, openings, or sites should not necessarily be considered as individual mines.
- Report strip-pit or auger mines and culm-banks separately from underground mines, whenever possible.
- Report plants engaged solely in processing coal mined at other locations separately from the mines.

Examples of mineral establishments are:

- mine only (a mine may be an underground, strip-pit, auger, culm-bank, or dredge operation)
- mine and processing plant
- processing plant only
- mines or sites under exploration, development, or maintenance
- plants under construction

Separate reports are required for lease and land acquisitions of mineral rights if they are located in a county different than any establishment operated. Include a designation of the kind of mineral expected to be produced. Such acquisitions may be included in the report of the nearest operating establishment if the establishment is located in the same county as the acquisition and produces the same type of mineral.

HOW TO REPORT FOR ESTABLISHMENTS WITH NO PRODUCTION DURING 1997

Return a completed report for any of your company's mineral establishments that had no production during 1997. Enter "0" in item 18B. Report information in the appropriate items, such as custodial employees, inventories, assets, or capital expenditures.

WHAT ACTIVITIES SHOULD BE REPORTED?

Include:

- operations of a mine together with its associated tipples; shops; auxiliary units; yards; processing plant; breaker; washery, or other processing plant; and offices
- a processing plant not at the site of the mines served, or operated under separate management from the mines, together with its associated shops, yards, auxiliary units, and offices
- other associated activities **when carried on at the same physical location** such as:
 - generating energy for the mine or plant (include a central power plant serving two or more mines or plants with the one for which the power plant furnishes the most electric energy)
 - maintenance of mine, plant, and equipment
 - receiving, shipping, storage, research, recordkeeping, health, safety, cafeteria, and other services

Exclude:

- operation of company stores, boardinghouses, bunkhouses, and recreational facilities
- separate sales branches, research laboratories, and general administrative offices. Report these on appropriate Census of Business, Census of Manufactures, or central office or auxiliary forms
- production of coal chemicals, coke, fuel briquets, or packaged fuel. Report such operations on Census of Manufactures form

WHAT PERIOD SHOULD EACH REPORT COVER?

- Each report should cover the calendar year 1997.
- If book records are not on a calendar-year basis, carefully prepared estimates are acceptable.
- If your fiscal year covers at least 10 months of calendar year 1997, and reporting on a calendar-year basis involves considerable cost, you may report on a fiscal-year basis. However, all payroll and hours-worked figures should relate to the calendar year rather than the fiscal year. (Use calendar-year payroll records from your tax records.)
- If an establishment began to operate or ceased to operate during 1997, report only the part of the year that the establishment was in operation.
- If the operator changed during the year, report only for that part of the year that your company operated the establishment. Report in item 15 the appropriate information on changes in **operator** or operations.
- Specify in the certification, item 22, the exact period that the report covers.

MULTIESTABLISHMENT COMPANIES ONLY

If any of the items requested are maintained in your records only at a divisional or company level, allocate their costs to each establishment for which you received a questionnaire. When determining transfer values of products and materials from one establishment to another (interplant transfers), include, in addition to direct costs of production, a reasonable proportion of "all other costs (company overhead) and profits." The establishments receiving such transfers should report them as purchased coal for processing, supplies, fuels, or electric energy at the same value plus cost of freight and other direct handling charges. (See item 10.)
